

# When we work together, we can build a more sustainable future.

## Enabling electric vehicles

We're building new EV infrastructure, starting with **~3,500 new charging ports** in Massachusetts by the end of 2020. This will make EV charging stations more accessible and affordable for businesses, so they can attract new customers, while achieving their sustainability goals.

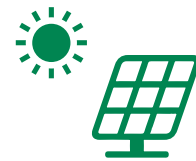

## Clean energy

We take our commitment to sustainability seriously. That's why we're dedicated to providing our customers with the benefits of emissions-free renewable power.

### Wind

In partnership with Ørsted, we're the #1 offshore wind developer in North America, generating enough energy to power 2,250,000 households.

### Solar

We operate 22 solar facilities, which provide an emissions reduction benefit equal to taking 7,600 cars off the road each year.

Let's save money and energy together.
